

# Olé Bilingual Preschool

## INCREASE YOUR CHILD'S PERFORMANCE AT SCHOOL

Being fluent in two languages will help to keep the brain sharper for longer, a study suggests.

Through these studies, it has also been demonstrated that those children who are adequately exposed to two languages at an early age score higher on standardized tests such as Math, English & General problem solving. They also are more flexible and creative, and they reach high levels of cognitive development at an earlier age. Research has shown that through foreign language exposure, preschool & elementary school children receive the opportunity to expand their thinking, to acquire global awareness, to extend their understanding of language as a phenomenon, and to reach a bilingual proficiency level in that foreign language. Ole Bilingual Preschool is the first preschool in the Dorset area to specialize in a fully bilingual preschool curriculum (Spanish and English).

**“More than just Childcare”**
